

GetNetWise

Now there's a **NEW**, easy-to-use online resource to help make your online activities safe and rewarding.

Tips

Simple but effective tips to protect your computer, safeguard your personal information and prevent unwanted e-mail "spam."

Tools

Information about tools that can help you safely and securely use the Internet. The Tools section provides step-by-step animated tutorials to help you activate the many tools that may already be installed on your computer. The Tools database also includes resources to filter spam, detect viruses, secure your network, protect your personal information or safeguard your children.

Take Action

Advice on appropriate steps to take if you believe your computer or privacy has been compromised. The Take Action section will help you stop unwanted intrusions. Review the tips to help prevent future problems.

GetNetWise

You're One Click Away...

The Internet is a wonderful place to learn, communicate, shop and play. To help ensure that your experience is always fun, safe and secure, you can take charge, get educated and be empowered. GetNetWise can help...

Dear Internet User:

The Internet is proving to be a wonderful resource for all of us – families and children, schools and libraries, researchers and students. As people of all ages and all walks of life take advantage of what the Internet offers, keeping our online experiences safe and rewarding, maintaining the security of our communications and computers, and assuring that we can control the amount of personal information shared online is increasingly important.

How can we protect our children from inappropriate material online? How do we ensure that our computers do not fall prey to hackers? How can we take control of the flow of our personal information? How can we prevent spam? If we do lose control of our computer, how do we report trouble?

The GetNetWise resource can help. This Web-wide, one-stop help resource for families is now expanded to help Internet users address a range of online concerns.

You'll find a guide to enhancing online experiences for your family, protecting your privacy, securing your computer, preventing spam, and more.

Participating GetNetWise companies, non-profit groups and associations are committed to providing users and their families with information they need to make the most of what the Internet has to offer while ensuring that their online experience is safe, positive and secure.

And as always, to GetNetWise, you're one click away. . .
